

One Step Further

**WOODY H61**

The Harvester Evolution from KONRAD

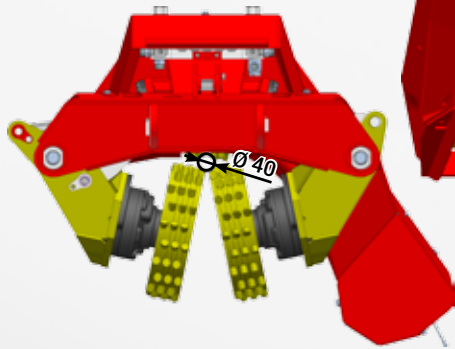

# WOODY H61

The 4-feed roller drive ensures less friction, at a fast and at the same time powerful feed

Strong frame construction designed for lasting work in big and hardwood timber

Energy-efficient hydraulic control (saw/feed rollers/grapple) by diameter optimized control

Optimal processing because of the new roller geometry from 4 -65 cm

Saw unit with automatic hydr. chain tensioner

Additionally controlled delimiting knives for a best delimiting

Powerful endless rotator

Optimized tilt geometry for the use as harvester

Optional top saw

Well proven grapple system for loading and sorting work

## WOODY H61

<b>Max.felling diameter</b>	75 cm	<b>Power required</b>	140 HP
<b>Delimiting diameter</b>	4-65 cm	<b>Hydraulic system</b>	250-350 bar, 220 l/min
<b>Max opening of grapple</b>	125 cm	<b>Rotator</b>	integrated endless rotation
<b>Feeding force</b>	30-40 kN	<b>Weight</b>	1220 kg
<b>Feeding speed</b>	0-5 m/sec
